

# Automated Urine Chemistry Analyzer

- / Throughput: up to 240 tests/hour
- / Evaluates 10 chemical and 3 physical parameters
- / Cost-effective operation without any special liquid reagents
- / Low sample volume; liquid level detection
- / Advanced, patented detection technique
- / Increased test strip capacity: up to 300 test strips
- / Increased on-board stability: up to 2 weeks
- / Built-in PMC module for measuring physical parameters
- / User friendly and flexible software; easy operation via color touch screen
- / Streamlined documentation by LIS connectivity
- / Automated QC analysis and self-check
- / Software and language upgrades via USB stick
- / RFID based rack identification

## LabUMat 2

# Automated Urine Sediment Analyzer

## UriSed 3 PRO

### Proficiency and efficiency in urinalysis

The LabUMat 2 is a fully automated urine chemistry analyzer evaluating 10 chemical parameters of LabStrip U11 Plus GL test strips and 3 physical parameters. Continuing its predecessor's mission, LabUMat 2 is a high quality and reliable instrument meeting the requirements of modern automated laboratories and providing walk-away operation. Easy operation via touch screen, automatic handling of test strips and test tubes – including sample mixing and precise dosing for each test pad by the pipetting unit – advanced detection technique and intelligent data management provide maximum efficiency while making urinalysis simple.

Technical Specifications	
Methodology:	reflectance photometer, 4 discrete wavelengths
Evaluated parameters:	Bilirubin, Urobilinogen, Ketones, Ascorbic acid, Glucose, Protein, Blood, pH, Nitrite, Leucocytes via LabStrip U11 Plus GL urine test strip
	Specific gravity, Color, Turbidity via PMC (Physical Measurement Cell) module
Max. throughput:	up to 240 tests / hour
Batch size:	100 test tubes
Test strip capacity:	up to 300 test strips
On-board stability of strips:	up to 2 weeks (with optional kit)
Min. sample volume:	2.0 ml (checked by liquid level sensor)
Memory:	last 10,000 results
Display:	800x600 TFT
Size:	600x650x635 mm (LxDxH)
Weight:	55 kg
Input:	100-250V AC / 50-60 Hz
Power consumption:	max 200 W
Interfaces:	USB, RS232 serial port, PS2, DisplayPort and DVI-D connection

### About 77 Elektronika

77 Elektronika Kft. is a major global developer, manufacturer and supplier of in vitro diagnostic medical devices, mainly urine analyzers, rapid test readers, blood glucose meters and their consumables. The products are supplied worldwide under the 77 Elektronika brand and as OEM products for market-leading multinational companies. 77 Elektronika was established in 1986 and is headquartered in Budapest, Hungary (EU). The company is committed to providing premium products and services to the complete satisfaction of its customers.

### New PHASE with CONTRAST

- / Revolutionary optical system combining bright-field and phase contrast microscopy
- / Fully automated sample preparation requiring only low sample volume
- / Live view mode: Real-time view of any viewfield of the cuvette to see moving microorganisms as well
- / No need for liquid reagents or calibrators
- / Automated QC analysis and maintenance procedures
- / Throughput: up to 150 tests/hour
- / UriSed 3 PRO and LabUMat 2 together make a Complete Urine Laboratory System
- / Dual-view for both bright-field and phase contrast images
- / Streamlined documentation by LIS connectivity
- / Zoomable HPF-like images
- / Improved consumable traceability: RFID based cuvette and rack identification

UriSed 3 PRO provides a uniquely advanced visualization and recognition of formed elements in urine sample using a special, patented combination of bright-field and phase contrast microscopy by automating the gold standard method of sediment analysis. It improves differentiation of hyaline casts, red blood cells, crystals, yeast and overall diagnostic performance in central screening laboratories as well as in specialist laboratories.

UriSed instruments are based on the UriSed technology, which represents a premium category solution for sediment analysis, providing high resolution, whole view field microscopic images in an automatic and reproducible way. The goal of UriSed Technology is to make the urinary sediment analysis faster, more reliable, more operator independent and independent of the manual microscopy.

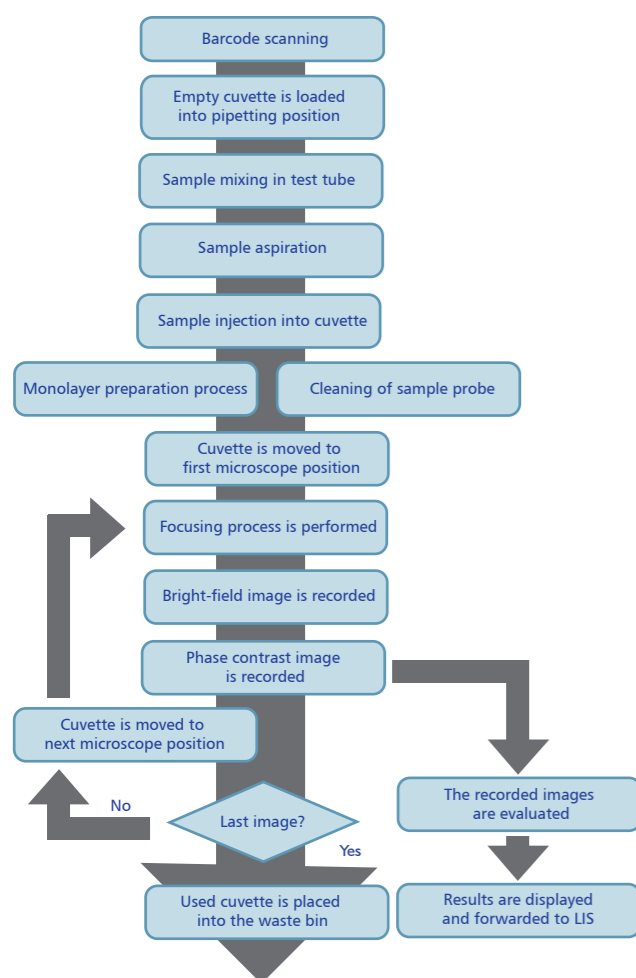

# Urine particles with never-seen-before definition and clarity

# LabUMat 2 & UriSed 3 PRO Complete Urine Laboratory System

## Measurement process

## Technical Specifications

Auto-detected particle classes:	Red Blood Cells (RBC); White Blood Cells (WBC); WBC Clumps (WBCC); Hyaline Casts (HYA); Pathological Casts (PAT); Squamous Epithelial Cells (EPI); Non-Squamous Epithelial Cells (NEC); Bacteria Cocci (BACC); Bacteria Rods (BACR); Yeast (YEA); Mucus (MUC); Sperm (SPRM); Crystals (CRY): Calcium-oxalate monohydrate (CaOxm), Calcium-oxalate dihydrate (CaOxd), Uric acid (URI), Triple phosphate (TRI), Amorphous material (AMO), RBC ghost and RBC-Aca flags.
Further classes for manual sub-classification are also available!	
Technology:	Cuvette based automated microscopy and image processing
Consumable:	UriSed cuvette
Consumable traceability:	with RFID tag
Memory capacity:	10,000 results (including all images)
Throughput:	Up to 150 tests/hour
Magnification:	Zoomable HPF-like images
Displayed images:	Phase contrast, bright-field and composite
Min. sample volume:	2.0 ml (checked by liquid level sensor)
Batch size:	100 test tubes
Barcode reader:	Built-in
Printer:	Optional, external (connected to operating PC)
Interfaces:	USB, LAN, RS232 serial port
LIS connectivity:	LIS2-A2 or HL7
Size:	600 x 640 x 635 mm (W x D x H, without PC)
Weight:	63 kg (without operating PC)
Power (measuring unit):	100-240V AC / 50-60 Hz / max. 200 W

## Chemistry and sediment analysis in one system

The efficiency of LabUMat 2 test strip analyzer and UriSed 3 PRO microscopic sediment analyzer – both manufactured by 77 Elektronika – can be maximized by using the two instruments together as one system.

Combined operation is enabled with physical and software connections between LabUMat 2 and UriSed 3 PRO. The results of both measurements are stored in a unified database and reported as a common report.

Since all necessary measurements which have to be done on urine samples are completed by this integrated system in one process, the combination of LabUMat 2 and UriSed 3 PRO accelerates laboratory throughput and provides the most effective and reliable solution for complete and professional urine analysis.

The UriSed Cascade configuration creates a physical and data link connection between one LabUMat 2 analyzer and two UriSed 3 PRO analyzers thereby providing an ideal solution for high-throughput laboratories with up to 200 tests/hour.

## All you need for complete urine analysis

LabStripU11 Plus GL test strips for LabUMat 2

Cuvettes for UriSed 3 PRO

Normal distilled water

Standard test tubes

The operation of the instrument is based on the patented UriSed Technology. Working without any special liquid reagents, UriSed 3 PRO performs sample preparation, produces whole viewfield microscopic images and evaluates them using the Artificial Intelligence-based Evaluation Module (AIEM), a high-quality image processing software.

Using the phase contrast technology UriSed 3 PRO provides improved performance. It has outstanding visualization and recognition capabilities for every particle type even the ones that conventional bright-field microscopy cannot easily detect (such as casts and ghost red blood cells). The RFID based identification process ensures easy registration of cuvettes as consumables on the instrument and allows traceability between measurement results and consumable lots. UriSed 2 and UriSed 3 can also be upgraded with RFID based consumable traceability.
