

IEM[®]
on life's side

- From Blood Pressure to Hemodynamics
- Modular Upgrades via Affordable Licenses
- The best Choice for a Reliable Diagnosis

THE NEW STANDARD FOR 24H BLOOD PRESSURE READINGS

Proven bestseller sets a new benchmark: Even years after your purchase the unit can be upgraded from standard ABPM to Central Blood Pressure (cBP) or even to complete Pulse Wave Analysis with eight additional hemodynamic parameters for vascular stiffness screening. These capabilities allow for an ideal cardiovascular management.

- Global Transmission of Measurements via GSM
- Considerable Time Savings for Doctors & Patients
- Significantly Better and Sustainable Medical Results

THE DIGITAL REVOLUTION IN THERAPY FOLLOW-UP

Reliable blood pressure adjustment from a distance: The Tel-O-Graph[®] GSM is the most innovative and convenient device for blood pressure monitoring from anywhere in the world. Your patient's blood pressure measurements are transferred directly, automatically and encrypted into a software for further analysis. You benefit from higher patient compliance, authentic blood pressure values and simplified workflows.
